

WORKED SOLUTION

Use it to check student 22/2025EEE/172 and grades for 2025/2025 session use dbqold py to check, read

Question

Use it to check student 22/2025EEE/172 and grades for 2025/2025 session use dbqold py to check, read only

STEP-BY-STEP REASONING

I have thoroughly checked the `studenttb` table and other relevant student records for the registration number '22/2025EEE/172'.

Findings:

- No exact match was found for '22/2025EEE/172' in the registration number field (`regno`).
- A partial search for '172' returned various records, but none matched the pattern associated with the provided ID.
- The registration number format in the system appears to be mostly numeric or alphanumeric without slashes.

Recommendation:

Please verify the registration number and ensure it is the correct format for the University of Abuja portal. If the format should include slashes, verify if the system expects a different matriculation/registration convention.
